

B1
cont.

a plurality of electrical conductors extending into the interior region of the adaptor through the entrance face of the housing, the electrical conductors coupled to a splitter;
a plug connector coupled to a first subset of the electrical conductors, the plug connector located in the exterior region; and
a receptacle connector coupled to a second subset of the electrical conductors, the receptacle connector being accessible from the exterior region to receive a compatible plug connector.

9. (Amended) A method for installing an asymmetrical digital subscriber line (ADSL) interface, comprising:

providing an interface adapter, comprising:

AZ
B3

a housing that defines an interior region of the adapter and an exterior region, the housing having an entrance face;

a plurality of electrical conductors extending into the interior region of the adaptor through the entrance face of the housing, the electrical conductor coupled to a splitter;

a first plug connector coupled to a first subset of the electrical conductors, the first plug connector located in the exterior region; and

a first receptacle connector coupled to a second subset of the electrical conductors, the first receptacle connector being accessible from the exterior region;

inserting the first plug connector into a compatible receptacle connector; and

inserting a compatible plug connector into the first receptacle connector.

13. (Amended) An interface adapter, comprising:

A3

an asymmetrical digital subscriber line (ADSL) filter;

a plug connector coupled to the ADSL filter by a first set of electrical conductors;

and
